

Credit Recovery Biology

The purpose of this course is to allow students who have previously failed Biology to gain mastery of course concepts; develop an appreciation for biological processes and discover how life science is an integral part of other sciences and society. They will gain an understanding of the cell, molecular basis of heredity, and biological evolution. They will investigate the interdependence of organisms. They will acquire an understanding of the matter, energy and organization in living systems. Students will pre-assess at the beginning of each unit to determine their course work path.

Students will
